Trainer/assessor guide

BSBINS401

Analyse and present research information

Welcome to this unit of study

This unit describes the skills and knowledge required to collect, organise, analyse and present information using available systems and sources. This includes identifying research requirements and sources of information, evaluating the quality and reliability of the information, and preparing and producing reports.

The unit applies to those who are required to analyse and apply their knowledge of the organisation to research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Identify and confirm research strategy.....	5
Identify research objectives according to organisational requirements	5
Identify potential sources for research information	8
Assess reliability of potential sources	10
Identify and confirm information research strategy is relevant to the research objectives	12
Check your understanding	15
Topic 2: Collect and store research information	17
Access and extract relevant information in a format suitable for analysis and distribution	17
Store research information	19
Check your understanding	23
Topic 3: Analyse and synthesise research information	25
Analyse stored information	25
Identify themes and draw conclusions	28
Support and justify assumptions and conclusions.....	31
Check your understanding	33
Topic 4: Present research information	35
Identify methods of reporting that align with the intended audience.....	35
Draft research report on findings	40
Facilitate review of draft report	43
Distribute research report.....	44
Obtain feedback and comments on suitability and sufficiency of findings.....	45
Check your understanding	47

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Identify and confirm research strategy
- » Collect and store research information
- » Analyse and synthesise research information
- » Present research information

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
