Trainer/assessor guide

BSBITA401

Design databases — Access 2010

Welcome to this unit of study

This unit describes the skills and knowledge required to design and develop a database (including queries, forms and reports) to meet a defined need using existing data.

It applies to individuals who may work independently or within an administrative support role, with the responsibility to use databases to store and retrieve data using commercially available database software.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide	4
Learning resource	5
Topic 1: Design database	5
Database design	5
Logical data models	13
Database software.....	17
Check your understanding	19
Topic 2: Develop database	21
Microsoft Access 2010.....	21
Primary key.....	45
Foreign keys.....	46
Functions and formulae.....	50
Passwords and access.....	57
Check your understanding	61
Topic 3: Develop queries, forms and reports	63
Queries.....	63
Input screens and forms.....	74
Reports.....	98
Check your understanding	107
Topic 4: Test and finalise database	109
Sample data.....	109
Database effectiveness	112
Naming databases.....	115
Confirming database readiness.....	117
Check your understanding	121
References.....	123
Assessment workbook	125
Unit information	127
What is competency-based assessment?.....	128
How will my competency be assessed?.....	129
Assessment agreement.....	130
Foundation skills checklist.....	131
Skills recognition	132
Topic 1: Design database	133
Topic 2: Develop database	134
Topic 3: Develop queries, forms and reports	135
Topic 4: Test and finalise database	136
Knowledge questions	137
Topic 1: Design database	138
Topic 2: Develop database	143
Topic 3: Develop queries, forms and reports	148
Topic 4: Test and finalise database	152

Performance tasks	155
Third party evidence collection agreement	156
Topic 1: Design database	157
Topic 2: Develop database	158
Topic 3: Develop queries, forms and reports	163
Topic 4: Test and finalise database	166
Completion record	170
Unit mapping and assessment checklist	171
Trainer/ assessor user instructions	173

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Design database
- » Develop database
- » Develop queries, forms and reports
- » Test and finalise database

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
