Trainer/assessor guide

BSBWHS413

Contribute to implementation and maintenance of WHS consultation and participation processes

Welcome to this unit of study

This unit describes the skills and knowledge required to contribute to implementing and maintaining work health and safety (WHS) consultation and participation as prescribed in legislation.

It also covers contributing to communicating relevant information, identifying feedback opportunities, and improving consultation and participation.

The unit applies to those working in a broad range of WHS roles across all industries.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Identify individuals and parties, and their roles and responsibilities for WHS consultation and participation.....	5
WHS laws, policies and procedures as they apply to WHS consultation and participation	5
Individuals with roles, duties, rights and responsibilities	8
Your role in health and safety consultation	11
Communicating duties and responsibilities	12

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Identify individuals and parties, and their roles and responsibilities for WHS consultation and participation
- » Contribute to implementing WHS consultation and participation processes
- » Contribute to processes for communicating and sharing WHS information and data
- » Contribute to assessment of WHS consultation and participation feedback processes
- » Contribute to improving WHS consultation and participation processes

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
