Trainer/assessor guide

BSBWHS414

Contribute to WHS risk management

Welcome to this unit of study

This unit describes the skills and knowledge required to contribute to WHS risk management, which includes the processes for identifying work health and safety (WHS) hazards and assessing and controlling the risk relating to those identified hazards.

It involves contributing to the development, implementation and evaluation of risk controls according to legislative and organisational requirements.

The unit applies to those working in a broad range of roles across all industries. WHS hazard identification and risk control processes are those defined in written workplace procedures.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Access information and data used to identify hazards, and to assess and control risks	5
Accessing and reviewing health and safety legislation	5
Internal sources of data and information that support hazard identification and risk management	8
External sources of information and data for risk management	9
Analysing data and information to determine the nature and scope of hazards	11
Confirm information and data with stakeholders and technical advisors or experts	13
Check your understanding	15
Topic 2: Contribute to identifying risk management requirements and compliance.....	17
Contributing to compliance with organisational policies, procedures and systems	17
Policies, procedures and systems	19
Contributing to compliance with legislation.....	20
Identifying duty holders, their roles and their responsibilities	21
Hazard identification and risk control tools	24
Check your understanding	27
Topic 3: Contribute to workplace hazard identification	29
Selecting hazard identification tools and techniques	29
Using hazard identification tools and techniques	31
Documenting hazard identification processes and results	33
Advising relevant personnel of the results of hazard identifications.....	34
Check your understanding	35
Topic 4: Contribute to WHS risk assessment	37
Identify individuals or parties at risk of harm	37
Applying risk assessment tools, techniques and processes	40
Contribute to documenting risk assessment results	43
Contribute to communicating risk assessment outcomes	45
Check your understanding	47
Topic 5: Contribute to developing and implementing risk controls	49
Selecting risk controls for identified hazards based on the risk assessment	49
Documenting agreed risk controls	51
Contribute to implementing risk controls and seek advice as needed.....	52
Communicating information about risk controls	54
Check your understanding	55
Topic 6: Contribute to evaluating effectiveness of risk controls	57
Ensuring the ongoing effectiveness of risk controls	57
Contribute to identifying measures for evaluating risk controls	59
Document, present and communicate monitoring plans	61
Check your understanding	63
References.....	65

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Access information and data used to identify hazards, and to assess and control risks
- » Contribute to identifying risk management requirements and compliance
- » Contribute to workplace hazard identification
- » Contribute to WHS risk assessment
- » Contribute to developing and implementing risk controls
- » Contribute to evaluating effectiveness of risk controls

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
