Trainer/assessor guide

BSBWHS419

Contribute to implementing WHS monitoring processes

Welcome to this unit of study

This unit describes the skills and knowledge required to contribute to monitoring a range of physical agents and conditions relating to work health and safety (WHS) in the workplace. It involves the use of a range of measuring devices to collect, interpret and report on workplace information and data in relation to those physical agents and conditions.

The unit applies to those working in a broad range of WHS roles across all industries.

The unit does not extend to hazard identification, risk assessment or developing risk controls based on the outcomes of monitoring, which are covered in BSBWHS414 Contribute to WHS risk management.

This unit does not qualify individuals to perform duties as a registered officer under any legislation.

NOTES

- » The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
- » The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide	4
Learning resource	5
Topic 1: Contribute to selecting measuring devices	5
Regulatory requirements and standards.....	5
Consultation	8
Identify the characteristics of agents or conditions	9
Identifying where measurements are to be taken	18
Selecting the measuring equipment	20
Determining the limits of your expertise.....	24
Check your understanding	25
Topic 2: Contribute to preparing to collect workplace information and data	27
Determining the sampling process	27
Outlining a sampling plan.....	31
Collecting information and data	33
Inspecting the work area and consulting workers	34
Checking the operability of sampling equipment.....	36
Check your understanding	37
Topic 3: Contribute to collecting workplace information and data.....	39
Calibrating monitoring equipment.....	39
Testing sampling equipment.....	41
Conducting sampling.....	43
Ensuring health and safety while collecting data	44
Recording readings.....	45
Check your understanding	47
Topic 4: Contribute to cleaning and storing equipment.....	49
Reinstating equipment and parts	49
Storing monitoring equipment	51
Check your understanding	53
Topic 5: Contribute to documenting and evaluating results of monitoring	55
Interpreting and evaluating results	55
Reporting on the monitoring processes	57
Retaining results and records	59
Check your understanding	63

Topic 5: Contribute to documenting and evaluating results of monitoring	112
Completion record	114
Unit mapping	115
Trainer/ assessor user instructions	119

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Contribute to selecting measuring devices
- » Contribute to preparing to collect workplace information and data
- » Contribute to collecting workplace information and data
- » Contribute to cleaning and storing equipment
- » Contribute to documenting and evaluating results of monitoring

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
