Trainer/assessor guide

BSBWHS513

Lead WHS risk management

Welcome to this unit of study

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Facilitate identification of WHS risk management requirements	5
Internal and external sources of information and data that apply to risk management	5
Identifying legislative requirements for risk management	8
Duty holders; who should be consulted; and who should participate	9
Roles and responsibilities that impact on risk management	11
Organisation specific factors that impact on risk management	13
Defining the risk management scope	15
Check your understanding	17
Topic 2: Lead risk assessment	19
Leading the hazard identification process	19
Identifying and documenting risk factors	22
Applying knowledge of legislation, hazards and risk factors to analyse and assess risk	24
Documenting risk assessments	26
Communicating the outcomes of risk assessment to required personnel	27
Check your understanding	29
Topic 3: Lead risk control	31
Organisational risk control policies and procedures for managing identified hazards.....	31
Selecting risk controls to address the level of risk and comply with policies, procedures and legislation	33
Plan to implement selected risk controls	35
Implementing the selected risk controls	37
Documenting and communicating selected risk controls to required personnel	38
Check your understanding	39
Topic 4: Evaluate effectiveness of WHS risk management process.....	41
Establishing the nature and scope of an evaluation process and the key performance indicators	41
Reviewing the effectiveness of risk management and the organisation's WHSMS	44
Modifying risk management processes in response to evaluations	46
Documenting risk management processes in the WHSIS	47
Communicating the findings	48
Check your understanding	49

Topic 1: Facilitate identification of WHS risk management requirements	92
Topic 2: Lead risk assessment	94
Topic 3: Lead risk control	96
Topic 4: Evaluate effectiveness of WHS risk management process	98
Completion record.....	100
Unit mapping.....	101
Trainer/ assessor user instructions.....	105

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Facilitate identification of WHS risk management requirements
- » Lead risk assessment
- » Lead risk control
- » Evaluate effectiveness of WHS risk management process

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
