## BSBWHS518

### Manage WHS hazards associated with maintenance and use of plant

#### Welcome to this unit of study

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS laws, as they apply to the management or control of items of plant being maintained and used in a workplace. It requires strong communication skills and systematic approaches to identify and resolve WHS issues associated with plant.

The unit applies to those who provide guidance to others in the workplace in managing WHS hazards associated with plant. The unit does not apply to the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant.

#### NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide .....	4
Learning resource.....	5
Topic 1: Identify WHS hazards associated with plant .....	5
Access sources of information about workplace plant.....	5
Inspecting items of plant for risk management.....	7
Determining hazards arising from plant use .....	8
Consulting others to confirm hazard identification .....	9
Recording and reporting hazards .....	10
Check your understanding .....	11
Topic 2: Assess WHS risks associated with plant.....	13
Accessing information about assessing risks.....	13
Consulting others to inform risk assessment .....	15
Recording and reporting risk assessment of plant.....	16
Check your understanding .....	17
Topic 3: Control WHS risks associated with maintenance and use of plant.....	19
Access sources of information to develop risk controls for safe maintenance and use of plant.....	19
Developing risk controls .....	21
Consulting internal and specialist personnel .....	23
Rights, obligations and duties of personnel .....	24
Monitoring the effectiveness of risk controls.....	25
Recording and reporting risk controls .....	26
Check your understanding .....	27
Topic 4: Advise on registration, licensing and certification issues associated with plant .....	29
Plant requiring registration and tasks requiring licensing .....	29
Documenting registration, licensing and certification .....	32
Monitoring compliance .....	33
Communicating registration requirements.....	34
Check your understanding .....	35
Topic 5: Manage training requirements for plant maintenance and operation .....	37
Identifying training needs associated with plant.....	37
Identifying skill gaps .....	39
Ensuring training is undertaken and completed new plant and systems .....	40
Maintaining training records .....	41
Check your understanding .....	43

# About this trainer/assessor guide

---

## Learning resource

---

The learning resource is divided into the following topics:

- » Identify WHS hazards associated with plant
- » Assess WHS risks associated with plant
- » Control WHS risks associated with maintenance and use of plant
- » Advise on registration, licensing and certification issues associated with plant
- » Manage training requirements for plant maintenance and operation

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

---

## Assessment workbook

---

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
