Trainer/assessor guide

CHCLLN003

Support adult numeracy learning

Welcome to this unit of study

The unit describes the skills and knowledge required to identify numeracy skill needs, develop strategies and resources to reinforce number, measurement, estimation and problem solving skills, and then support learners during various phases in the development of their numeracy competence.

This unit applies to individuals such as paid or volunteer tutors, who work under the guidance of a program supervisor with numeracy development expertise.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Identify learner numeracy requirements	5
Scope of own role and responsibilities in supporting the learner	5
Factors that may inhibit the development of numeracy skills	10
Negotiating numeracy learning needs and establishing goals	16
Check your understanding	19
Topic 2: Plan strategies and resources to support mathematics learning for numeracy	21
Learning environments, activities, and evaluation methods	21
Monitoring learner understanding to inform planning	28
Developing resources appropriate to learner needs and context	30
Check your understanding	35
Topic 3: Facilitate application of mathematics skills for numeracy	37
Numeracy demands and opportunities in daily life	37
Different uses and functions of mathematics.....	40
Numerate understandings—culture, age, ability, interest, need.....	45
Applications of mathematics skills and knowledge for numeracy	51
Modelling use of mathematics skills	54
Check your understanding	59
Topic 4: Support learners to develop mathematics skills for numerate understanding	61
Supporting learners in applying mathematics for numeracy	61
Implementing strategies to enhance learner abilities and needs	64
Encouraging learners to problem solve using mathematics	66
Using numeracy language to focus learners on mathematics	68
Evaluating learning outcomes and discussing with supervisor	73
Check your understanding	75
Topic 5: Provide structured activities to further develop learners' mathematics skills and knowledge	77
Planning strategies—terminology and supporting learning	77
Using mathematics for numeracy understanding	79
Improving mental computation and calculation skills	87
Ensuring learners check for reasonableness of solutions.....	89
Encouraging learners and building their confidence	90
Check your understanding	93
Topic 6: Review strategies used to enhance learner skills	95
Monitoring learner progress against learning outcomes	95
Seeking support and feedback from supervisors.....	97
Reviewing and adjusting strategies based on feedback	99
Check your understanding	103
References.....	105

Assessment workbook	109
Unit information	111
What is competency-based assessment?.....	112
How will my competency be assessed?.....	113
Assessment agreement	114
Foundation skills checklist.....	115
Skills recognition	116
Topic 1: Identify learner numeracy requirements	117
Topic 2: Plan strategies and resources to support mathematics learning for numeracy	118
Topic 3: Facilitate application of mathematics skills for numeracy	119
Topic 4: Support learners to develop mathematics skills for numerate understanding	120
Topic 5: Provide structured activities to further develop learners' mathematics skills and knowledge	121
Topic 6: Review strategies used to enhance learner skills	122
Knowledge questions	123
Topic 1: Identify learner numeracy requirements	124
Topic 2: Plan strategies and resources to support mathematics learning for numeracy	131
Topic 3: Facilitate application of mathematics skills for numeracy	137
Topic 4: Support learners to develop mathematics skills for numerate understanding	147
Topic 5: Provide structured activities to further develop learners' mathematics skills and knowledge	156
Topic 6: Review strategies used to enhance learner skills	166
Topic 7: Specific knowledge evidence.....	170
Performance tasks	172
Third party evidence collection agreement	173
Topic 1: Identify learner numeracy requirements	174
Topic 2: Plan strategies and resources to support mathematics learning for numeracy	176
Topic 3: Facilitate application of mathematics skills for numeracy	177
Topic 4: Support learners to develop mathematics skills for numerate understanding	178
Topic 5: Provide structured activities to further develop learners' mathematics skills and knowledge	180
Topic 6: Review strategies used to enhance learner skills	182
Completion record	183
Unit mapping	184
Trainer/ assessor user instructions	188

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Identify learner numeracy requirements
- » Plan strategies and resources to support mathematics learning for numeracy
- » Facilitate application of mathematics skills for numeracy
- » Support learners to develop mathematics skills for numerate understanding
- » Provide structured activities to further develop learners' mathematics skills and knowledge
- » Review strategies used to enhance learner skills

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
