Trainer/assessor guide

FSKNUM014

Calculate with whole numbers and familiar fractions, decimals and percentages for work

Welcome to this unit of study

This unit describes the skills and knowledge to interpret and calculate with whole numbers, routine fractions, decimals and percentages for workplace activities and tasks. It includes interpreting and selecting embedded mathematical information, undertaking routine arithmetical problem solving processes, and communicating results to complete workplace activities.

An individual performing these tasks works independently and uses their own familiar support resources.

This unit applies to individuals who use, or are preparing to use, numeracy skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) numeracy core skill indicators .09, .10 and .11 at level 3 in the workplace and employment domain of communication.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Select and interpret routine mathematical information	5
Identify number information in workplace tasks and texts	5
Interpret number information in workplace tasks and texts.....	8
Check your understanding	11
Topic 2: Perform mathematical calculations to complete workplace task	13
Select arithmetical problem solving process for completing the workplace task	13
Estimate outcome of calculations.....	16
Perform calculations	18
Check working out and result in relation to estimates	21
Check your understanding	23
Topic 3: Communicate workplace mathematical information	25
Use written mathematical representation to document number information	25
Use oral mathematical language to discuss number information	26
Check your understanding	27
References.....	29
Assessment workbook.....	31
Unit information.....	33
What is competency-based assessment?.....	34
How will my competency be assessed?.....	35
Assessment agreement.....	36
Foundation skills checklist.....	37
Skills recognition.....	38
Topic 1: Select and interpret routine mathematical information	39
Topic 2: Perform mathematical calculations to complete workplace task	40
Topic 3: Communicate workplace mathematical information	41
Knowledge questions	42
Topic 1: Select and interpret routine mathematical information	43
Topic 2: Perform mathematical calculations to complete workplace task	45
Topic 3: Communicate workplace mathematical information	47
Topic 4: Specific knowledge evidence.....	48
Performance tasks.....	57
Third party evidence collection agreement	58
Topic 1: Select and interpret routine mathematical information	60
Topic 2: Perform mathematical calculations to complete workplace task	62
Topic 3: Communicate workplace mathematical information	64
Completion record.....	66
Unit mapping.....	67
Trainer/ assessor user instructions.....	69

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Select and interpret routine mathematical information
- » Perform mathematical calculations to complete workplace task
- » Communicate workplace mathematical information

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
