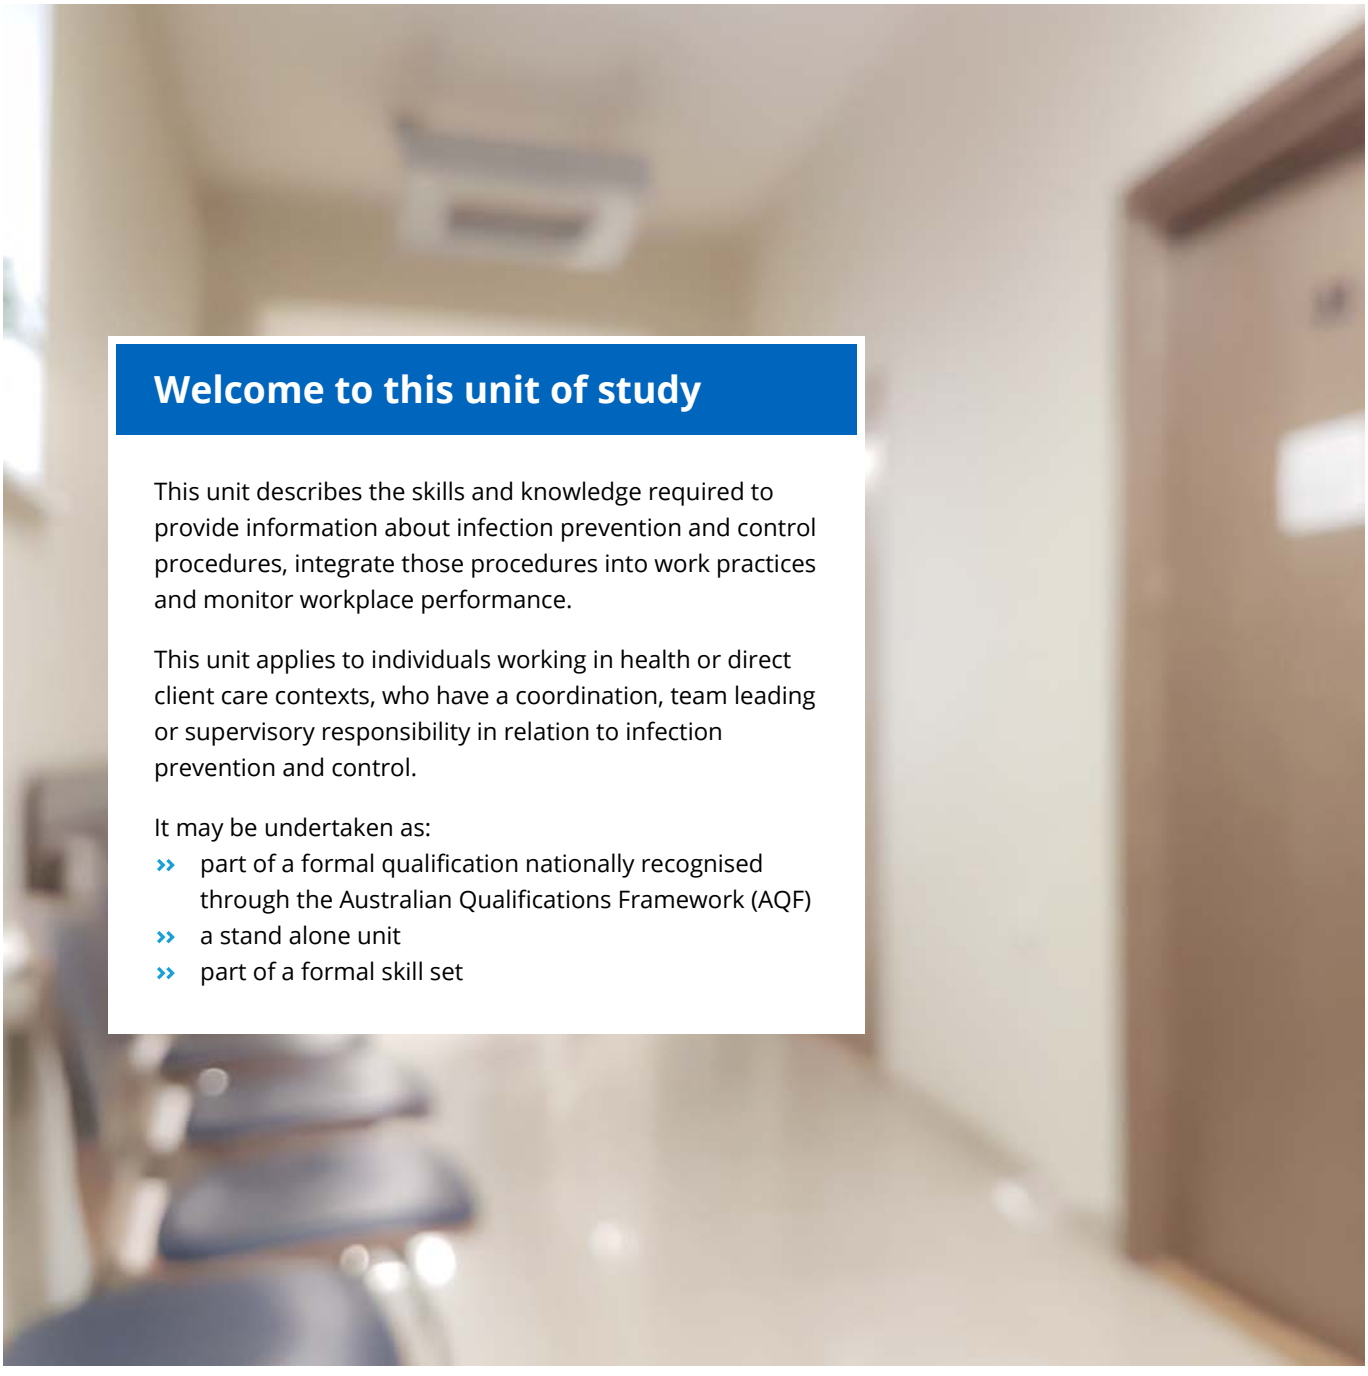
Trainer/assessor guide
HLTINF003
Implement and monitor infection prevention and control policies and procedures



Welcome to this unit of study

This unit describes the skills and knowledge required to provide information about infection prevention and control procedures, integrate those procedures into work practices and monitor workplace performance.

This unit applies to individuals working in health or direct client care contexts, who have a coordination, team leading or supervisory responsibility in relation to infection prevention and control.

It may be undertaken as:

- part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- a stand alone unit
- part of a formal skill set

Topic 2: Integrate infection prevention and control policy and procedure into work practices 88
Topic 3: Monitor infection prevention and control procedures performance and implement improvements in practices 90
Completion record **92**
Unit mapping and assessment checklist **93**
Trainer/ assessor user instructions **96**

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- Provide information about infection prevention and control policies and procedures
- Integrate infection prevention and control policy and procedure into work practices
- Monitor infection prevention and control procedures performance and implement improvements in practices

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- a set of true or false questions
- a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- information on competency-based assessment
- instructions on how you will be assessed
- assessment tools to assess your competence
- instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
