# Trainer/assessor guide

## HLTINF006

# Apply basic principles and practices of infection prevention and control

### Welcome to this unit of study

This unit describes the performance outcomes, skills and knowledge required to apply basic infection prevention and control principles in work settings including implementing standard and transmission-based precautions and responding to risks.

This unit applies to individuals working in a range of industry and work setting contexts.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

# Contents

<b>About this trainer/assessor guide .....</b>	<b>4</b>
<b>Learning resource.....</b>	<b>5</b>
Topic 1: Identify the role of infection prevention and control in the work setting .....	5
Identify standards and guidelines relevant to own role and work setting .....	5
Identify infection risks and hazards associated with own role and work setting .....	8
Identify roles and responsibilities of self and others in relation to infection prevention and control .....	11
Identify control measures to minimise risk in accordance with relevant national standards and guidelines.....	14
Communicate effectively with others in relation to risk management.....	17
Record identified risks and risk management strategies within scope of own role .....	19
Check your understanding .....	23
Topic 2: Follow standard and transmission-based precautions for infection prevention and control in the work setting .....	25
Implement personal hygiene practices in the work setting .....	25
Practice hand hygiene in accordance with national standards and guidelines .....	28
Follow current national standards and guidelines for selection and correct use of Personal Protection Equipment (PPE) as required .....	32
Follow procedures for environmental cleaning and management of waste .....	35
Identify and respond to situations where transmission-based precautions or enhanced cleaning is required .....	39
Check your understanding .....	41
Topic 3: Respond to potential and actual exposure to infection risks within scope of own role.....	43
Identify, respond to and communicate potential or actual risk of, or breach in, infection control .....	43
Assess the risk and take appropriate immediate action in accordance with industry and organisational guidelines.....	45
Communicate any breach in infection control and risk management strategies in place to the supervisor, manager or responsible authority and seek advice on actions required following a breach in infection control.....	47
Implement control measures to minimise contamination of people, materials and equipment .....	49
Follow processes for management of spills and exposure to blood or body fluids .....	50
Document incidents and responses and report according to organisational policies and procedures.....	53
Ensure all records, materials and equipment are stored in a designated clean area .....	55
Check your understanding .....	57

<b>Unit mapping</b> .....	<b>148</b>
<b>Trainer/assessor instructions and requirements</b> .....	<b>154</b>

# About this trainer/assessor guide

---

## Learning resource

---

The learning resource is divided into the following topics:

- » Identify the role of infection prevention and control in the work setting
- » Follow standard and transmission-based precautions for infection prevention and control in the work setting
- » Respond to potential and actual exposure to infection risks within scope of own role

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

---

## Assessment workbook

---

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
