## PUAWER001B

# Identify, prevent and report potential workplace emergency situations

### Welcome to this unit of study

This unit covers the competency required to identify and prevent the development of workplace emergency situations, or to minimise their consequences, and to report if emergency protection systems, emergency control equipment and evacuation systems are compromised.

For this unit the term workplace is defined as the area encompassed by an individual's responsibilities. All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices.

This unit:

- » has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 37452002
- » covers the work required before the emergency services or specialist response team arrives
- » does not cover the specific use of equipment to prevent workplace emergency situations

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

<b>Unit mapping and assessment checklist .....</b>	<b>73</b>
<b>Trainer/ assessor user instructions.....</b>	<b>75</b>

# About this trainer/assessor guide

---

## Learning resource

---

The learning resource is divided into the following topics:

- » Identify, monitor and report situations that could lead to workplace emergencies
- » Identify, report and correct situations that could prevent workplace emergencies from being safely handled

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

---

## Assessment workbook

---

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
