Trainer/assessor guide

SITEEVT008

Manage event staging components

Welcome to this unit of study

This unit describes the performance outcomes, skills and knowledge required to analyse event staging requirements and organise and monitor different staging services and products. It requires the ability to use advanced planning, organisation and communication skills combined with detailed knowledge of the event management process and broad understanding of specialist component services.

This unit is relevant to events that are diverse in nature and are coordinated in many industry contexts, including the tourism, hospitality, sport, cultural and community sectors.

It applies to event coordinators who operate independently, and are responsible for making a range of operational decisions. They may work in event management companies, in event venues, or in organisations that organise their own events.

The unit does not cover the high levels of technical expertise required to provide individual specialist services, such as catering, audio visual or technical, creative and sporting services. It is also distinct from staging specialisation units that apply to staging technicians and stage managers in the entertainment industry.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Analyse staging requirements
- » Source and organise staging contractors
- » Monitor staging preparations
- » Evaluate staging components

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
