## SITXWHS002

# Identify hazards, assess and control safety risks

### Welcome to this unit of study

This unit describes the performance outcomes, skills and knowledge required to identify hazards, assess the associated workplace safety risks, take measures to eliminate or minimise those risks, and document all processes.

The unit applies to all tourism, travel, hospitality and event sectors and to any small, medium or large organisation.

All people working at all levels can participate in risk assessments which are commonly conducted as a team effort. Frontline operational personnel, who operate with some level of independence and under limited supervision, would assist other colleagues during the process. Individuals may conduct the assessments independently of others.

This unit incorporates the requirement, under state and territory work health and safety (WHS) legislation, for businesses to conduct risk assessments involving their workers to manage the safety of those workers and anyone else in the workplace.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

# About this trainer/assessor guide

---

## Learning resource

---

The learning resource is divided into the following topics:

- » Identify hazards
- » Assess the safety risk associated with a hazard
- » Eliminate or control the risk

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

---

## Assessment workbook

---

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
