Trainer/assessor guide

TLIB3002

Test equipment and isolate faults

Welcome to this unit of study

This unit involves the skills and knowledge required to test equipment and to isolate faults in accordance with relevant codes of practice, regulations and workplace requirements within the transport and logistics industry.

It includes scoping and planning operational checks, checking equipment through its full operating range, and isolating faults and/or formulating recommendations for adjustment, repair or replacement.

Work is performed under some supervision, generally within a team environment.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Scope operational checks	5
Observing the condition of equipment.....	5
Test procedures	8
Recording preliminary observations	10
Check your understanding	13
Topic 2: Plan operational checks	15
Checking specifications and notes	15
Testing sequences	16
Hazards, risks and control measures	18
Obtaining resources	30
Check your understanding	33
Topic 3: Check equipment through its full operating range	35
Testing equipment.....	35
Check your understanding	39
Topic 4: Isolate fault and/or formulate recommendations.....	41
Proposing equipment repairs	41
Report options and recommendations.....	43
Procuring parts	45
Check your understanding	49
Assessment workbook	51

Topic 3: Check equipment through its full operating range	90
Topic 4: Isolate fault and/or formulate recommendations.....	91
Completion record.....	93
Unit mapping and assessment checklist	94
Trainer/ assessor user instructions.....	98

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Scope operational checks
- » Plan operational checks
- » Check equipment through its full operating range
- » Isolate fault and/or formulate recommendations

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
