Trainer/assessor guide

TLID0007

Operate specialised load shifting equipment

Welcome to this unit of study

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes of practice, permits, workplace requirements and relevant regulatory requirements as part of work undertaken in the stevedoring, transport, warehousing and logistics industries. It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Prepare work for current working conditions.....	5
Hazards, risks and control measures	5
Assessing traffic flow and work area to ensure safe operation.....	12
Use attachments appropriate to type of load	13
Calculate working load limit (WLL).....	17
Report safety issues to relevant personnel	19
Check your understanding	21
Topic 2: Operate specialised loading equipment.....	23
Mechanical Materials Handling Equipment (MMHE).....	23
Preparation and safe use of equipment.....	24
Operating specialised load shifting equipment.....	25
Manage engine power for efficiency	29
Managing torque range	30
Reporting faults or damage to equipment.....	31
Check your understanding	33
Topic 3: Locate load and identify load characteristics.....	35
Locating and identifying the load	35
Follow loading and unloading plans	37
Load characteristics that affect loading and unloading	39
Handling hazardous goods.....	40
Label classes for dangerous goods	41
Check Load characteristics do not exceed lifting capacity	46
Check your understanding	47
Topic 4: Move materials and loads	49
Manoeuvring equipment	49
Limits of the equipment.....	50
Move materials safely	51
Check your understanding	53
Topic 5: Monitor and operate controls.....	55
Interpret and operate equipment systems and controls	55
Identify and report control faults	56
Check your understanding	57
Topic 6: Shut down and secure equipment	59
Equipment is brought to a controlled halt	59
Shut down equipment safely	60
Secure equipment safely	61
Identifying and reporting faults or malfunctions.....	62
Check your understanding	63

Assessment workbook	65
Unit information	67
What is competency-based assessment?.....	68
How will my competency be assessed?	69
Assessment agreement	70
Foundation skills checklist.....	71
Skills recognition	72
Topic 1: Prepare work for current working conditions	73
Topic 2: Operate specialised loading equipment	74
Topic 3: Locate load and identify load characteristics	75
Topic 4: Move materials and loads	76
Topic 5: Monitor and operate controls	77
Topic 6: Shut down and secure equipment	78
Knowledge questions	79
Topic 1: Prepare work for current working conditions	80
Topic 2: Operate specialised loading equipment	85
Topic 3: Locate load and identify load characteristics	92
Topic 4: Move materials and loads	101
Topic 5: Monitor and operate controls	104
Topic 6: Shut down and secure equipment	106
Topic 7: Specific knowledge evidence	110
Performance tasks	117
Third party evidence collection agreement	118
Topic 1: Prepare work for current working conditions	119
Topic 2: Operate specialised loading equipment	121
Topic 3: Locate load and identify load characteristics	123
Topic 4: Move materials and loads	125
Topic 5: Monitor and operate controls	126
Topic 6: Shut down and secure equipment	127
Completion record	129
Unit mapping	130
Trainer/ assessor user instructions	134

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Prepare work for current working conditions
- » Operate specialised loading equipment
- » Locate load and identify load characteristics
- » Move materials and loads
- » Monitor and operate controls
- » Shut down and secure equipment

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
