Trainer/assessor guide

TLID0020

Shift materials safely using manual handling methods

Welcome to this unit of study

This unit involves the skills and knowledge required to shift materials safely using manual handling methods.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

Contents

About this trainer/assessor guide	4
Learning resource.....	5
Topic 1: Assess risks associated with relocating load	5
Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method	5
Storage locations are determined and potential routes to be followed are identified	8
Effect of load relocation on the original load base is predicted	11
Points of balance are estimated	12
Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance.....	14
Worksite hazards are identified, and corrective action is taken prior to commencing shifting products, goods or materials.....	15
Risks in potential routes are considered	17
Risks to self are identified arising from the required lifting, load carrying, set down or movement of products, goods or materials	18
Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified	19
Team lifting processes are considered when moving loads	22
Appropriate personal protective equipment (PPE) is identified and used	26
Size to weight ratio of items to be manually handled are identified	28
Check your understanding	31
Topic 2: Plan load relocation.....	33
Relocation of the load is planned consistent with the code of practice for manual handling and in accordance with the risk assessment	33
Process for relocating load is proposed, including predicting and planning for potential difficulties	36
Proposed process is checked for compliance with codes of practice and workplace procedures	38
Check your understanding	41
Topic 3: Relocate load	43
Actions for lifting, lowering and carrying, pulling and pushing are in accordance with workplace procedures and WHS/OHS requirements when moving a load	43
Team lifting tasks are coordinated	45
Planned process and route are followed.....	46
Relocated products, goods or materials are set down without damage to goods, personnel or equipment and are checked for stability	48
Relocation is checked to ensure it meets work requirements and variances are reported to relevant personnel.....	49
Check your understanding	51
References.....	53
Assessment workbook.....	55
Unit information	57
What is competency-based assessment?.....	58
How will my competency be assessed?.....	59
Assessment agreement.....	60
Foundation skills checklist.....	61

Skills recognition	62
Topic 1: Assess risks associated with relocating load	63
Topic 2: Plan load relocation.....	64
Topic 3: Relocate load	65
Knowledge questions	66
Topic 1: Assess risks associated with relocating load	67
Topic 2: Plan load relocation	87
Topic 3: Relocate load.....	92
Project	99
Practical assessment	103
Overview	103
Instructions for the learner	105
Learner agreement	106
Instructions for trainer/assessor or third party	107
Third party evidence collection agreement	108
Practical demonstration	109
Simulation.....	110
Completion record	125
Unit mapping	126
Trainer/assessor instructions and requirements	130

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Assess risks associated with relocating load
- » Plan load relocation
- » Relocate load

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
