Trainer/assessor guide

TLIF0006

Administer a fatigue risk management system

Welcome to this unit of study

This unit of competency involves the skills and knowledge required for road transport schedulers or supervisors/managers to administer a fatigue risk management system within the Transport and Logistics industry.

It includes identifying and managing risks associated with fatigue during heavy vehicle driving, operating within a fatigue risk management system, planning trips and updating records, and developing and implementing policies, procedures and strategies to minimise fatigue in the workplace.

Work is performed under limited supervision generally within a team environment.

Being awarded this unit of competency is a necessary requirement to obtaining National Heavy Vehicle Regulator (NHVR) Fatigue Management Accreditation but is only one of the criteria. Prospective applicants should check with the NHVR before undertaking training and/or assessment.

It may be undertaken as:

- » part of a formal qualification nationally recognised through the Australian Qualifications Framework (AQF)
- » a stand alone unit
- » part of a formal skill set

About this trainer/assessor guide	6
Learning resource.....	7
Topic 1: Manage heavy vehicle driver fatigue strategies.....	7
Symptoms of fatigue in heavy vehicle drivers are identified in accordance with workplace procedures and regulations	8
Potential causes and symptoms of fatigue are identified and actions are taken to minimise their effects in accordance with the fatigue risk management system	11
Heavy vehicle driver schedules are planned and implemented in accordance with HVNL regulations, fatigue risk management strategies and driver consultation and legal requirements and responsibilities for effective management of fatigue within the workplace for drivers are identified and monitored	15
Compliance within the workplace fatigue risk management system and related workplace procedures is managed	19
Compliance of heavy vehicle drivers operating and under exemption notice, is monitored and reviewed.....	28
Heavy vehicle drivers are provided with feedback on identified non-compliance with the fatigue risk management system.....	30
Training and/or counselling is supported by the supervisor to address heavy vehicle driver non-compliance and provided to develop and enhance heavy vehicle driver workplace fatigue risk management strategies	34
Heavy vehicle driver health, wellbeing and personal fatigue risk management strategies are communicated with drivers and relevant personnel	41
Communication strategies are implemented to ensure heavy vehicle drivers are informed of relevant fatigue compliance obligations	50

Topic 2: Operate within a road transport fatigue risk management system.....	53
Driver completion of workplace induction in the workplace fatigue risk management system is ensured	53
Road transport fatigue risk management system is reviewed and maintained in accordance with HVNL and workplace procedures	56
Fatigue risk management plans and procedures are distributed to relevant personnel in accordance with workplace procedures.....	62
Actions are taken in conjunction with relevant parties in the chain of responsibility to ensure compliance with the workplace's fatigue risk management policy and procedures	65
Outcomes of incidents and safety investigations are reviewed and analysed to identify the extent to which fatigue may have been a contributing factor, corrective actions are taken as required, and personnel who contribute to a non-compliance with workplace fatigue procedures are provided appropriate feedback.....	70
External risk factors within the supply chain and chain of responsibility relating to the effects of fatigue are identified and reviewed in accordance with fatigue risk management regulations and corrective actions are taken as required	74
Reports relating to non-compliance are submitted to relevant personnel with details of action taken to prevent recurrences and non-compliance from external parties in the chain of responsibility are recognised and reported in accordance with workplace procedures	77
Exemptions for work, rest, emergency, and/or record keeping are identified and documented, as required	83
Topic 3: Schedule work and rest hours in compliance with a road transport fatigue risk management system.....	87
Heavy vehicle driver rest and work hours are scheduled with consideration to the trip and road conditions in accordance with fatigue risk management workplace procedures and regulations	87
Heavy vehicle driver input into schedules is obtained and considered in planning heavy vehicle driver trips.....	90
Changes in schedules/rosters and workplace procedures related to fatigue risk management are identified and managed.....	92
Legal requirements, liabilities and responsibilities for fatigue risk management within the organisation are identified and applied and HVNL fatigue risk management compliance and safety strategies are identified and implemented.....	93
Reviews are undertaken of scheduled versus actual hours of work and where a non-compliance is identified, appropriate action is taken to analyse the reasons and to take corrective action	99
Topic 4: Plan and navigate heavy vehicle trips	103
Trip conditions, timelines, work and rest requirements are planned and reviewed to ensure driver fatigue is minimised, in accordance with workplace procedures, driver fitness for work and HVNL, proposed trip is communicated with heavy vehicle driver/s and relevant personnel, deviations to proposed trip plan are communicated to heavy vehicle driver/s and relevant personnel in accordance with workplace procedures and regulations, unplanned situations are responded to in accordance with workplace procedures, in a manner that minimises risk to personnel and equipment, and exemption requirements are planned in accordance with workplace procedures and regulations	103
Workplace procedures for loading and unloading a heavy vehicle are considered to ensure driver does not become impaired by fatigue.....	106

Topic 5: Update and maintain records	107
Workplace policies and procedures for fatigue risk management record storage and retrieval are implemented and monitored and road transport fatigue risk management system and workplace procedures are reviewed and amended, as required, to ensure compliance with HVNL.....	107
Work diary/records are monitored and reviewed for compliance with workplace procedures and HVNL.....	111
Relevant heavy vehicle workplace records are maintained in accordance with workplace policies and procedures	118
References.....	120
Assessment workbook	123
Unit information	125
What is competency-based assessment?	126
How will my competency be assessed?	127
Assessment agreement	128
Foundation skills checklist.....	129

About this trainer/assessor guide

Learning resource

The learning resource is divided into the following topics:

- » Manage heavy vehicle driver fatigue strategies
- » Operate within a road transport fatigue risk management system
- » Schedule work and rest hours in compliance with a road transport fatigue risk management system
- » Plan and navigate heavy vehicle trips
- » Update and maintain records

Each topic provides information to help you gain the skills and knowledge required to perform the work tasks to which they refer. Read the information and practise the skills described. You should also take the opportunity to undertake additional independent research. Your trainer/assessor may also provide supplementary information including interpretation of the contents of this resource.

At the end of each topic is:

- » a set of true or false questions
- » a set of multiple choice questions

These questions provide an opportunity to check your understanding and progress. They are self-marking and do not form part of the assessment for the unit.

Assessment workbook

To have this unit recognised as a formal qualification you need to have your skills and knowledge assessed. The assessment workbook provides:

- » information on competency-based assessment
- » instructions on how you will be assessed
- » assessment tools to assess your competence
- » instructions on how to complete the assessment tasks within each assessment tool

To be assessed as competent you need to provide evidence that you have the skills and knowledge to undertake the requirements of this unit. This assessment of competency is made by a qualified trainer/assessor from a registered training organisation. You must complete all the assessments as directed by your trainer/assessor to the required standard. It is not necessary to work through the guide in the order in which it is written. However this is at the discretion of your trainer/assessor.
